# Color Blind Accessiblity

**Accessibility** is not an option.

It is a **right**

# Problem
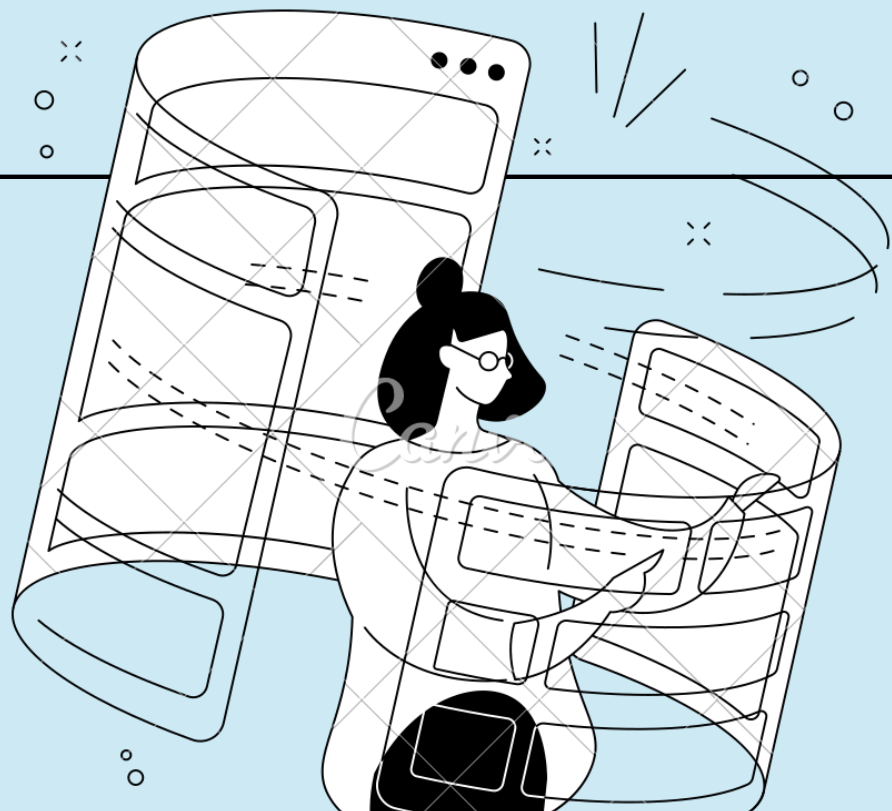

## PROBLEM || PEOPLE WITH DISABILITIES

- The Hardest Part of Disability is Being Ignored
- Inequalities in education

## PROBLEM || CHALLENGES

- **Vision Impairment.**
- Deaf or hard of hearing.
- Physical disability.

## PROBLEM || COMPANY

- Invest more and more time to make the course accessible
- Invest in his team to make them learn the accessibility rules
- Increase the file size

# Solution | Vision Impairment (Color Blind)

## STEP 1

Customize 3 modes :-
- Green weakness
- Red Weakness
- Blue Weakness

## STEP 2

Instead Using Slides with 3 layers using Just one slide with "Js code execution" trigger

## STEP3

- Document all "Js code" With explanation to anyone can use it.
- Make the company satisfy using it through reduce the time and make it for more audience

# Result

- If we have a course that Contains **100 slides and layers.**
- It converts into **25 slides** with only 3 triggers in master.

# PROTOTYPE

Just **one** layer

Just **3 Triggers** on the **master** slide

Slide - 1 Clean

Execute JavaScript
When the timeline starts on this slide
If mode = value blind

Execute JavaScript
When the timeline starts on this slide
If mode = value green

Execute JavaScript
When the timeline starts on this slide
If mode = value red

Untitled Slide                    (Base Layer)

# Thanks A lot!
